

SWIRL RGBW 32"

Description

Custom light source options and high-tech controllers completely transform our 16", 23", and 32" Swirl fixtures. Go for brighter whites, a rainbow of color or hundreds of patterns of color synchronization, sequencing, advancing, rolling and more.

Features

- Laser-cut steel construction with Satin Nickel finish
- 42" length adjustable stem kit includes three 12" stems and one 6" stem
- 144' wire length
- Fixture can accept up to four additional stem sections for a maximum overall fixture height of 63.1" (155.7 cm)
- Available in three sizes
- Hang straight swivel attaches to top of stem
- Damp location rated
- RGBW color controllable Swirl Pendant enables infinite color combinations and white light
- Lighting features can be manually controlled or use the many programmed color changing routines available pre-loaded in the controller

Controls

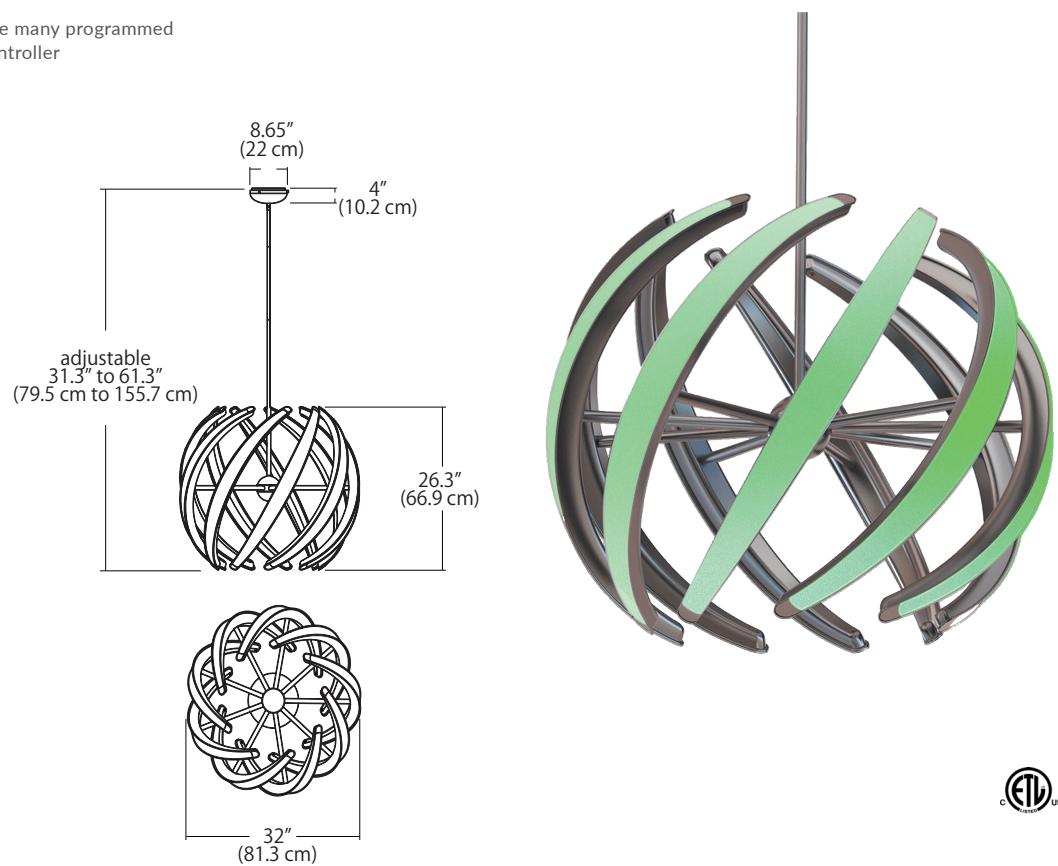

- **W1 - Wireless WIFI controller** allows control of all color changing features through a cell phone and other wireless devices with downloadable app (IOS and Android OS). (Requires installer to remote mount the supplied driver near to the fixture canopy. Remote splice box not included.)
- **W2 - Wireless hand-held controller** provides a handheld remote controller (with wall-mounted holder) that allows control of all color changing features. (Requires installer to remote mount the supplied LED driver near to fixture canopy. Remote splice box not included.)
- **H1 - Hardwired wall-mounted controller** provides an easy to use touch control panel that operates all color changing features. Comes with wall mounted multi-function color control panel, 12' of five-conductor cable and terminal block. (Requires installer to remote mount the supplied LED driver near to control panel location. Remote splice box not included.)
- **H2 - Hardwired DMX controller** provides a cable connection to most DMX color changing controllers. Includes 12' of five-conductor cable and terminal block for connection to cable from remote mounted DMX controller. (Requires installer to remote mount the supplied LED driver near DMX controller. Remote splice box not included.)
